

Amendments to the Specification.

Please replace the first paragraph appearing on page 5, lines 1-11 of the application, with the following amended paragraph:

The network, such as the Internet 102, is also connected with a wireless communications service provider 108. The wireless communications service provider 108 is, for example, a cellular or other packetized data wireless communications network, such as a cellular digital packet data ("CDPD") or other network. The wireless service provider 108 connects by wire connection with the network, such as the Internet 102. Alternatively, the wireless communications service provider 108 could connect with the network 102 by other communications connection, such as fiber optic, coax cable, wireless channel, or other communications connection. Furthermore, although the wireless communications service provider 108 is illustrated as a single particular communications channel, multiple links and multiple channels of those links, for example, communications links of wired and wireless channels, can alternatively provide the same functions and are included for purposes of the description.

Amendments to the Oath/Declaration.

The attached correction to the Oath/Declaration includes reference to 35 U.S.C. 119(e),
as to provisional priority.

Attachment: Corrected Oath/Declaration
